Content

The EUNET YC has planned for a training weekend meeting the needs of young professional educators busy in the field of European Youth Education. The YC will organize this training, which will provide new insights into recent educational developments.

Training seminar topics will concentrate on Simulations and the latest developments in the field of Mini-LARPs (Live Action Role Plays) – a relatively new and engaging method to activate participants of all age groups. Mini-LARPs puts participants into different scenes and scenarios to trigger empathy for certain political, cultural or social circumstances. It is a concept that focusses on a non-formal and holistic learning experience.

We will also learn how to evaluate this deep learning processes evoked by Mini-LARPs. Along the lines of debriefing and evaluation we want to deal with supervision, group motivation, building of confidence and the creation of positive learning atmospheres.

This international training weekend will also offer the chance of getting in touch with educators from all over Europe and share best practice experiences, as well as meeting partners for future projects.

Feedback

There will be daily evaluations to find out about individual feelings, the group atmosphere and the status of the agreed aims of the project. There will also be time and place for criticism and new ideas.

Methods

Non-formal learning methods. All methods are designed to activate the participants. The methodical repertoire is orientated on the target group and shall support the engagement with various European topics.

Questions concerning programme and organisation

Claudia Dombrowsky, Berlin-Brandenburgische Auslandsgesellschaft (BBAG) e.V.
